

Dibakar Sutra Dhar

Senior Software Engineer

✉ iamdibakardipu@gmail.com 🔗 dibakar.me 🌐 dibakarsutradhar 📄 dibakarsutradhar 📍 Dhaka, BD

👤 PROFILE

Senior Software Engineer with **6+ years of experience** building distributed backends, high-performance Rust systems, and data infrastructure. Experienced in asynchronous services, real-time data pipelines, AI systems, and blockchain infrastructure. Built platforms serving **50k+ users and 30k+ live portfolios**.

📁 PROFESSIONAL EXPERIENCE

MC² Finance 🔗

Apr 2024 – Mar 2026 | Switzerland, Remote

Senior Software Engineer

- Led **Rust ETL/ELT pipelines** ingesting blockchain RPC data across EVM + Solana from multiple nodes and **Snowflake** warehouses, powering real-time portfolio analytics for **50k users with ~10ms latency**.
- Re-architected parts of the data platform using **TypeScript and Cloudflare Workers**, improving edge scalability and service/domain isolation.
- Built **Raisolo**, an AI research and content automation platform integrating multiple LLM providers and agent workflows.
- Developed an **MCP server & AI gateway pipeline** enabling agent-based analysis of DeFi vaults and portfolio data through YieldFinder.
- Implemented **ERC-4337 account abstraction** wallet flows bridging on-chain and off-chain transactions.
- Worked across distributed infrastructure, data pipelines, observability, and production systems in a remote engineering environment.

Dosier 🔗

Oct 2022 – Oct 2023 | United States, Remote

Software Engineer

- Built a token-gated **IPFS storage platform** with Solidity smart contracts and ERC-4337 wallet authentication.
- Designed **on-chain/off-chain access-control systems** and improved wallet onboarding, contributing to approximately **20% growth in active users**.

QuickDesk 🔗

May 2021 – Jan 2022 | Singapore, Remote

FullStack Developer

- Built CRM APIs and browser-based tools supporting **real-time WhatsApp and voice-call communication**.
- Developed a React Chrome extension and supporting backend functionality, contributing to a **30% improvement in customer conversion**.

Signup.cash 🔗

Jul 2020 – May 2021

Software Engineer

Kuala Lumpur, Malaysia

- Developed a non-custodial **Bitcoin Cash wallet**, NFT/SLP token factory, and cryptographic SDKs.
- Performance-tuned wallet and transaction-processing backend systems, contributing to approximately **40% adoption growth**.

🧠 SKILLS

Core: Rust, Node.js, TypeScript, Python

Backend: Tokio, Axum, Async/Await, Microservices, REST/gRPC, Protobuf, Distributed Systems, ETL/ELT

Infrastructure: Linux, Docker, Kubernetes, Terraform, Github Actions, CI/CD, AWS, Cloudflare, SQS, Kafka, Pulsar, Flink

Data: PostgreSQL, Redis, Timeseries, IPFS, SQL, MongoDB, GraphDB, VectorDB, Snowflake

AI Systems: LiteLLM, AI Agents & Gateway, MCP, n8n, Context Engineering

Observability: Grafana, OpenTelemetry, Sentry, Datadog, Posthog

🎓 EDUCATION

Bachelor of Information Technology | 3.70/4.00

2019 – 2022 | Kuala Lumpur, Malaysia

University of Central Lancashire | SEGi University 🔗

Valedictorian - 2021, Dean's Listed 5x

🌐 LANGUAGES

English: Fluent, **Bangla:** Native
