

# Dibakar Sutra Dhar

Senior Software Engineer

✉ iamdibakardipu@gmail.com    🔗 dibakar.me    🌐 dibakarsutradhar    💻 dibakarsutradhar    📍 Dhaka, BD

## 👤 PROFILE

Senior Software Engineer (5+ yrs) building **AI systems, distributed backends, and blockchain infrastructure**. Experienced with **LLM integrations, AI agents, Rust systems, and real-time data pipelines**. Built platforms serving **50k+ users and 30k+ live crypto portfolios**.

## 📁 PROFESSIONAL EXPERIENCE

### MC<sup>2</sup> Finance 🔗

Senior Software Engineer

Apr 2024 – Mar 2026  
Switzerland, Remote

- Led development of **Rust ETL and analytics pipelines** ingesting blockchain RPC data across **EVM + Solana**, powering **real-time portfolio analytics for 50k users (30k active portfolios, ~10ms latency)**
- Re-architected the pipeline using **TypeScript + Cloudflare Workers**, improving edge scalability and domain isolation
- Built **Raisolo**, an AI research and content automation platform integrating numerous **LLM providers and agent workflows**
- Developed **MCP server + AI gateway pipelines** enabling AI agents to analyze DeFi vaults and portfolio data (YieldFinder)
- Implemented **ERC-4337 account abstraction wallet flows** bridging on-chain and off-chain transactions

### Dossier 🔗

Software Engineer

Oct 2022 – Oct 2023  
United States, Remote

- Built token-gated **IPFS storage** platform with **Solidity** smart contracts and ERC-4337 wallet authentication
- Designed on-chain/off-chain access control and improved wallet onboarding, contributing to **~20% increase** in active users

### QuickDesk 🔗

FullStack Developer

May 2021 – Jan 2022  
Singapore, Remote

- Built **CRM** APIs and browser tools enabling real-time WhatsApp/call communication.
- Developed **React** Chrome extension UI, boosting customer conversion by **30%**.

### Signup.cash 🔗

Software Engineer

Nov 2020 – May 2021  
Kuala Lumpur, Malaysia

- Developed **non-custodial** Bitcoin Cash wallet, NFT/SLP token factory, and cryptographic **SDKs**.
- Performance-tuned wallet and transaction backend, driving **40% adoption growth**.

## 🧠 SKILLS

**Core:** Rust, Node.js, TypeScript, Python, Solidity

**Backend:** Microservices, REST/gRPC APIs, WebSockets, ETL pipeline, distributed systems

**AI Systems:** LLM APIs, AI Agents, MCP servers, prompt pipelines, context engineering

**Infra & Cloud:** Cloudflare (Workers, Durable Objects, KV, D2, R2, Queues), AWS (Lambda, S3), Apache, NGINX, Kafka, Docker, CI/CD, Datadog, AI Agents, LLM, MCP, n8n, Kubernetes, Grafana

**Databases:** PostgreSQL, Redis, Timeseries, IPFS, SQL, MongoDB, GraphDB

**Blockchain:** Smart contracts, EVM chains, Solana

## 🔧 FOSS & PROJECTS

### DevSonket 🔗

Co-founder of the largest Bengali open-source cheatsheet project supporting developers globally.

## 🎓 EDUCATION

**Bachelor of Information Technology | 3.70/4.00**

2019 – 2022 | Kuala Lumpur, Malaysia

SEGi University | University of Central Lancashire 🔗

Valedictorian - 2021, Dean's Listed 5x

## 🌐 LANGUAGES

**English:** Fluent, **Bangla:** Native
